Subject: Request for Study

I would like to request a formal study be done on the chemicals that are being discharged into the air by Military Police around the hours of 9pm and midnight on 11/20/2016 against the peaceful demonstrations of the people of Standing Rock Sioux Tribe and the non-Native individuals from various regions who were there in solidarity and as Observers, all whom were witness to and streamed the live footage of these events. I am asking as a concerned citizen that study be done to protect the people who may be adversely affected by the chemicals composition.

Thank you
